Chicago, February 9, 2010 (word count: 303)
PROCEDES CHENEL INTERNATIONAL, a French company, has just launched its two latest products made of Drop Paper (non-woven, M1 fire rated): Honeycomb, a honeycombed ceiling stretched on wire, and Pipe & Drop, a self-standing, foldable partition.

Graded as M1 non-flammable, both of these products can be safely integrated into public areas, such as stores, showrooms, offices, booths, museums, etc. Moreover, Drop Paper helps spread soft lighting thanks to the fiberglass it contains. Available in 15 standard colors, it gives the possibility of producing colored ceilings (a choice of three thicknesses) and paper walls up to 1 or 2 m (3.5 or 6.5 ft.) high.

When stretched across a ceiling, Honeycomb hides unsightly ceilings, while diffusing vertical lighting. In the event of a fire, it helps clear smoke from the premises and allows sprinklers to extinguish the fire.

This elegant, lightweight ceiling treatment comes in heights of 4, 8 and 16 cm (about 1.5, 3 and 6 in.) depending on the desired effect and is very easy to mount. Honeycomb can also be used vertically.

Also lightweight and elegant, Pipe & Drop vertical partitions are easy to install and can be deployed over 5 m (16 ft). When folded, their size is minimal, and when unfolded they are about 35 cm (13.5 in.) wide and perfectly stable. They can be backlit or adorned with fairy lights and can be placed on multiple ground shapes. Pipe & Drop comes in three fluorescent colors (yellow, pink and orange) in addition to the standard range.

Note: Both Honeycomb and Pipe & Drop are patented products.
